

ELKHORN AREA SCHOOL DISTRICT GOALS

To make our educational philosophy operative, the School Board has established the following goals.

1. To establish a set of curricular offerings that will meet the needs of all students, attempting to develop the student's intellectual, social, emotional, psychological, physical, and creative capacities to the fullest in preparation for continued schooling, job opportunities, and life situations.
2. To recognize that each student is an individual and should be treated as such.
3. To continue progress toward the concept of shared decision-making by an improved climate of trust, openness, positive working relationships, professional behavior, and high levels of student and staff enthusiasm.
4. To continue to develop a clearly defined system of firm, fair and consistent discipline where expectations and consequences are effectively communicated and enforced.
5. To provide a support system for students identified "at risk".
6. To continue an on-going plan for the upgrading of the district's buildings and grounds; which includes safety, cleanliness, and beautification needs.
7. To continue to emphasize that the primary responsibility of the elementary teacher is the teaching of reading and mathematics.
8. To continue to improve all aspects of internal and external communication and public relations.
